RE: 1792 (03000)

Dear Mr. Craddock:

Southwest Gas Corporation (Southwest) is in receipt of the above referenced notification letter concerning the proposed SFPP, L.P./Kinder Morgan El Paso to Phoenix Expansion Project. According to the information included with the notification, there are three segments involved in the project, two of which are outside of the state of Arizona and will have no impact on Southwest. Southwest is interested in Segment C which is the portion proximate to Tucson, Arizona.

Southwest operates and maintains facilities throughout Tucson and vicinity and would like the opportunity to review detailed plans as they are developed to ensure there are no impacts to any of these existing facilities or any future planned facilities. As plans are developed, Kinder Morgan can communicate them directly to Southwest's Southern Arizona Division Engineering Department as follows:

Randy Smith
Manager/Engineering/Southern Arizona
Mailing Address:
P.O. Box 26500
Tucson, AZ 85726-6500
Location:
3401 E. Gas Road
Tucson, AZ 85714-1994

In general, Southwest supports the project and is willing to work with Kinder Morgan to help make it successful in any way we can. Please contact me at 702-364-3156 if you have any questions.

Sincerely,

Douglas E. Gapp
Supervisor/Engineering Planning

Dear Mr. Craddock:

We have received notice regarding the above pipeline extension and we are not willing to have the pipeline extended through our property. We requested a map of the extension from Mr. Cornman and the map provided did not give us enough information to determine if our property would be involved or impacted and therefore until we have sufficient information we are unwilling to consent to cooperate on this project. Further, if the pipeline is to go through our property, we need assurances that the pipeline company will coordinate with us and our tenants to assure us that any impact on our tenants will be minimized, and that there will be no environmental impact on our property. Please feel free to contact me regarding this so that we can discuss this further.

Sincerely,
MIMCO, Inc.

Mr. Matt Craddock,

Our main concern about this project you wrote to us about is that we do not want the pipe lines any closer to our home. The further away the better. Our gates are locked during the day because to the burglaries at our home, you would need to tell us in advance if you need to pass through our property.

Thank You,

Dear Mr. Higgins,

Thank you for your correspondence on behalf of the Federal Energy Regulatory Commission dated January 31, 2006, regarding the proposed expansion of a natural gas pipeline system in Arizona and New Mexico, Phoenix Expansion Project. The Hopi Tribe claims cultural affiliation to prehistoric cultural groups in Arizona and New Mexico, and therefore we appreciate your solicitation of our input and your efforts to address our concerns.

The Hopi Cultural Preservation Office supports the identification and avoidance of archaeological sites and Traditional Cultural Properties. Therefore, we have determined that this proposed action is likely to effect cultural resources significant to the Hopi Tribe, and request further consultation.

Please provide us with copies of the cultural resource survey reports on these project areas for review and comment. Subsequent to review of the cultural resource survey reports, we may request a meeting and field tours to determine the proposed project's possible impacts on cultural resources significant to the Hopi Tribe.

Please contact Terry Morgart at the Hopi Cultural Preservation Office if you have any questions or need additional information. Thank you again for your consideration.

Respectfully,

151

Re: El Paso to Phoenix Expansion Project

Dear Mr. Craddock:

Thank you for your letter dated February 27, 2006 regarding the proposed SFPP, L.P./Kinder Morgan El Paso to Phoenix Expansion Project. The University of Arizona has a significant interest in the pipeline expansion project and requests our inclusion in any information and notifications. Please add the following address to your mailing list and send a copy of the environment assessment when available for review later this year.

Send all correspondence to:

Subject: SFPP, L.P./Kinder Morgan El Paso to Phoenix Expansion Project

Dear Mr. Craddock:

Thank you for providing the information documents describing the proposed SFPP, L.P./Kinder Morgan El Paso to Phoenix Expansion Project (proponent) in your letter No. 1792 (03000). Additionally, a meeting was held at the United States Section, International Boundary and Water Commission (USIBWC) Headquarters offices in El Paso on February 16, 2006, with representatives from Kinder Morgan, CH2M Hill, and Gonzalez Consulting. This informational meeting was held to provide USIBWC personnel with information on the proposed project and identify any requirements and information that the proponent would need to provide on the project to the USIBWC.

The proposed project is located in the USIBWC Rio Grande Flood Control Project (RGFCP). The application process at the USIBWC requires an assessment of the proposed project in order to comply with federal environmental regulations and to meet our obligations for operating and maintaining the RGFCP. Project proponents should coordinate with our agency when proposing projects in or near the Rio Grande as well as with the appropriate state and federal regulatory agencies.

Construction of the pipeline will involve crossing properties owned or managed by the USIBWC. Projects that include construction on property owned or managed by the USIBWC require approval from this agency with the issuance of a license. To obtain a license from the USIBWC, we will require complete compliance with the National Environmental Policy Act (P.L. 91-190, as amended), the Endangered Species Act (P.L. 93-205, as amended), the National Historic Preservation Act (P.L. 89-665, as amended), and the Clean Water Act (Federal Water Pollution Control Act) (P.L. 92-500, P.L. 93-243, and P.L. 95-217; 33 U.S.C. Sec. 1251, et seq.).

As part of the license process, the USIBWC also requires that final engineering drawings be submitted for our review and approval before beginning construction of the pipeline and any related facilities. The drawings must show the location of each component in relation to the Rio Grande. The plans should also include provisions to repair any damage to the levee, bed and banks of the river and prevent erosion. The USIBWC shall evaluate the relationship of the project action to international obligations of the United States. The project should not provoke deflection or significant obstruction to normal or flood flows of the Rio Grande in

(915) 832-4100 • (FAX) (915) 832-4190 • <http://www.ibwc.state.gov>

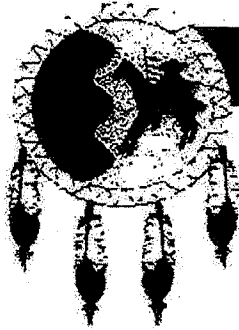

accordance with Article IV-B of the 1970 Boundary Treaty of the International Boundary and Water Commission. Questions regarding the USIBWC license/lease program should be addressed to Mr. William Finn, Realty Representative, at (915) 832-4789.

We would welcome the opportunity to provide comments and input into the EA for this project and will submit the EA notice card to be included as an interested party for this project. If you have any questions concerning these comments please contact Gilbert G. Anaya, of the Environmental Management Division, at (915) 832-4702.

Sincerely,

Carlos Peña Jr., P.E.

Re: [1792 (03000)] Kinder Morgan Energy Partners and Subsidiary SFPP El Paso to Phoenix
Expansion Project to enhance and improve approximately 143 miles of pipeline running from
west Texas through New Mexico and Arizona

Dear Mr. Craddock:

Thank you for your letter of February 27th regarding the above referenced pipeline project.

At this time, the Comanche Nation has no immediate concerns or issues regarding the project; however, please keep us informed of the project progress. We also would like to receive any additional archaeological reports and findings for the project area.

If in the process of the project human remains or archaeological items are discovered, we request that you immediately cease the project work and notify us so that we may discuss appropriate disposition with you and the other Tribal Nations that may be affected by such discoveries.

We look forward to your reports as activities proceed.

Sincerely,

Re: L.P./Kinder Morgan El Paso to Phoenix Expansion Project

Dear Mr. Craddock:

Thank you for notifying the New Mexico Department of Transportation (NMDOT) of the proposed SFPP, L.P./Kinder Morgan El Paso to Phoenix Expansion Project. The NMDOT, as land managing agency and permitting agency, looks forward to consulting with the Bureau of Land Management (BLM) as per Section 106 of the National Historic Preservation Act and the National Environmental Policy Act. NMDOT will be reviewing the cultural and environmental documentation prepared for this project as part of the permitting requirements for any portion of the project within NMDOT right of way.

In the notification that was sent, I would like to point out that the color-coded land status map prepared by TRC indicates only federal lands. Please be aware that there probably is state-owned land in your project area, specifically State Trust Land and NMDOT land. NMDOT acquires land from private sources when right of way is adjacent to private land, and NMDOT will need to review the portions of the project that are on NMDOT land before any permits are issued for work within highway rights of way.

Again, we appreciate being notified of this project early in the planning stage. The NMDOT Environmental Section looks forward to our consultation with the BLM on this project.

Sincerely,

Gwyneth Duncan

Re: SFPP, L.P./Kinder Morgan El Paso to Phoenix Expansion Project

Dear Mr. Craddock:

Thank you for including the Cochise County Planning Department in the scoping process for the proposed SFPP, L.P./Kinder Morgan El Paso to Phoenix Expansion Project.

Cochise County requires that Kinder Morgan obtain a building permit for the proposed pump station *if the chosen site for said pump station lies within Cochise County's jurisdiction, i.e. unincorporated, non-federal lands*. The Department has been in contact recently with Mr. Dave Cornman at Kinder Morgan regarding this requirement.

The Cochise County Planning Department looks forward to continued involvement throughout the Environmental Assessment process for the El Paso to Phoenix Expansion Project. Upon completion of the EA, please forward a copy to the Cochise County Planning Department for review.

Sincerely,

Michael Turisk, Planner
